## Results of Ignace Municipal Election 2022

Congratulations to the newly elected Council and to all that put their name forward to run in the Ignace Municipal Election 2022. Over the next four years, this council will be responsible for making local decisions and dealing with complex and sometimes contentious issues. The newly elected Mayor and Council will provide a high-quality service to the residents of the Ignace community while meeting the Municipality's goals and objectives. The Mayor and Council will be officially sworn in on November 7<sup>th</sup> at the Ignace Silver Tops Centre (this is open to the public) at 6:30 p.m. and the first Council meeting will be on November 15<sup>th</sup>, 2022 at 6:00 p.m. Council meetings will still be held in person in the multi-purpose room at the Township of Ignace office and on-line.

The Ignace Lions Club meets on the last Monday of every month. They are looking for new members. All money raised in the community stays in Ignace and they support people in need by building accessibility ramps and purchasing prescription glasses for them. We collect car batteries; reach out to any member to arrange a pick up.

**Current Fundraiser** – Prizes 1. \$500 gift certificate for Shoprite Fine Foods, 2. \$150 gift certificate for Braggs 3. \$100 gift certificate for The Gallery. Contact any member for tickets. They are \$2.00 each or 3 for \$5.00. The draw is December 17<sup>th</sup>, 2022 at the Ignace Silver Tops Seniors Centre where there will be a Breakfast with Santa from 9:00 a.m. until 12 noon. Berry Wetelainen is normally sitting at Shoprite Fine Foods on Fridays selling tickets, but feel free to call him at 1-807-936-0310 to purchase tickets for a chance to win a great prize.

# In Flanders Fields

by John McCrae

In Flanders fields the poppies blow

**Between the crosses, row on row,  
That mark our place; and in the sky  
The larks, still bravely singing, fly**

Scarce heard amid the guns below.

**We are the Dead.** Short days ago  
**We lived, felt dawn, saw sunset glow,  
Loved, and were loved,** and now we lie  
In Flanders Fields.

Take up our quarrel with the foe:  
To you from failing hands we throw  
**The torch; be yours to hold it high.**  
If ye break faith with us who die  
We shall not sleep, **though poppies grow**  
**In Flanders Fields.**

# Elinor Barr's Visits Ignace Public Library

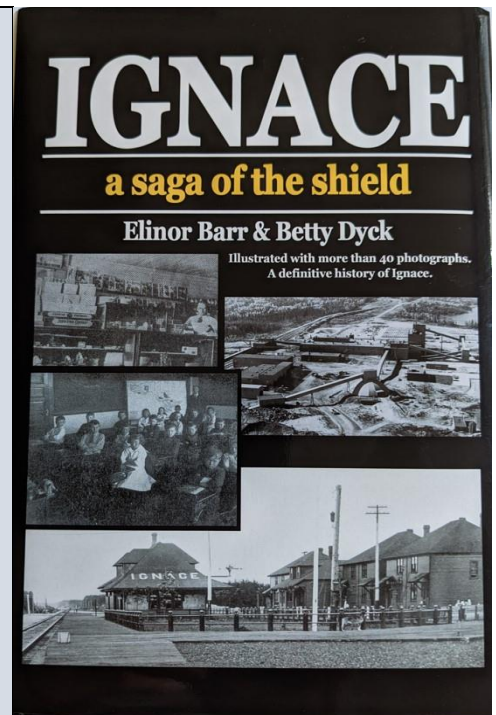

(corrections made in the article)

August 18<sup>th</sup> was a very special day at the Ignace Public Library. We had the privilege and honor of having Elinor Barr, one of our local authors, join us for an afternoon of book signing and sharing memories of Ignace. She was born in 1933 and was raised in Ignace. She resides in Thunder Bay. Elinor and her coauthor Betty Dyck wrote the book "Ignace – Saga of the Shield" which was published in 1979. Unfortunately, Betty couldn't be here for the event. Elinor shared with us that it took her and Betty 5 years to write the book. It is a treasure for many who live here or have lived here. Elinor was very eager to share her stories and there were many. She took the time to sign old or new copies of "Ignace – Saga of the Shield". We are very fortunate to have someone like Elinor who has such a **passion** for our little community and has preserved many historical facts and memories for us and generations to come.

We'd like to say a huge thank you to many people who made this event possible. First and foremost, Elinor Barr for taking the time to come and spend it with us, having you here was an extreme honor. Isabelle Laperriere for being Elinor's chauffeur, you came not knowing anyone and you left as a new friend. We want to thank our Board members and staff for helping with the behind the scenes that kept the event running smoothly. Thank you to the Northwoods, the Township staff for always assisting us even when it's short notice. Thank you to Karen Dufault and the Summer Students for the interviews they shared with us from members of our community. Thank you to Heidi West for the tour of the Mary Berglund Community Health Centre.

Finally, a big thank you to everyone that was able to attend, we so appreciated you joining us to help make Elinor's visit a memorable one for all.

If you are interested in purchasing a copy of Ignace – Saga of the Shield, we have some left for sale. Message us on our Facebook page or email (ceoignacelibrary@ignace.ca) or call us @ 807-934-2280.

The Public Works Department has received the new trash compactor and been trained in its safe operation. The landfill compactor will lengthen the life of the landfill site by several years. Waste compactors save space by making waste smaller and easier to sort, turning bulky rubbish or recyclables into smaller sized. Uncompacted waste is a space-killer whereas compacted waste takes up a fraction of the space. This means storage or working space can be increase.

## ANNUAL HARVEST DINNER

180 pounds of turkey, 150 pounds of potatoes, 100 pounds of carrots, 100 pounds of stuffing, gravy, buns and cranberry sauce!!

The Annual Harvest Dinner was held on October 20<sup>th</sup>, with just over 300 meals served. The team at MBCHCH looks forward to this event each year and is proud to be able to host such an important community event. Right picture is Jodie and Danielle serving two meals to Betty and Calvin Cull. Great job by all MBCHCH staff.

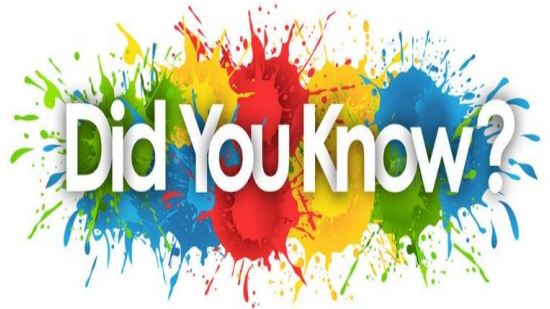

The pumpkin weighed in at 495 pounds!! **Just WOW!** Randy Rosin was the winner for guessing the weight of the pumpkin to be 475 pounds. Randy won a tabletop BBQ and accessories. Congratulations Randy. The pumpkin was donated by a gardener from Thunder Bay (must be something good in that dirt). The pumpkin is now being composted.

## National Day for Truth and Reconciliation

The team at MBCHCH spent the day on September 30, National Day for Truth and Reconciliation, to commemorate the history and legacy of residential schools. The morning was spent in a facilitated learning and discussion session led by Kaagiikwenan Inspirations. The afternoon was out at the community garden to paint a raised garden box and place a hand painted commemorative rock. The day was a piece of the learning journey, we, as a team have embarked on.

### WINTER VEHICLE PARKING

Bylaw 67.2021 is a bylaw to Regulate Traffic and Parking within the Township of Ignace.

**67.2021 Section 6; states;**

**No person shall park or permit to be parked on any highway between the hours of 7:00 am and 6:00pm daily from 01 November to 30 April of the following year.**

Vehicles parked illegally during these dates and times may be subjected to a \$100 fine or have the vehicle towed, at the owners' expense, as per 67.2021 Section 15.1.

## Do you have Issues with Frozen Water Lines?

Aqua-Flo is a waterline freeze protection appliance that uses the principle that moving water does not freeze readily. Aqua-Flo maintains a continuous flow of water in your water service line 24 hours a day. This is accomplished by an automatic BLEED, CAPTURE and RETURN method. Water is constantly flowing, but is not being wasted into the sewer system.

Simply stated, this appliance maintains constant flow of water through a single service line and returns the water into the system through the same water line without any loss. **Also, as the temperature gets cold, check your heat trace on your water lines; insulate the lines before the snow gets here.**

**REMEMBER TO TURN YOUR UNIT ON!!**

November 16<sup>th</sup>, 2022 – Potluck dinner with entertainment and prizes

#### Continuing Weekly:

Exercise Classes – M, W, F at 10:00 am – open to all seniors

Drop-In – Mondays 1:00 – 4:30 pm

Bingo – Tuesday 1:15 pm

Computer Classes – Tuesday – 6:00 pm, Thursday at 1:30 pm

Open Mic Music – Wednesday at 1:00 pm

Thursday Lunches – 11:30 am – 1:00 pm

Looking ahead to December – December 3<sup>rd</sup>, our annual Christmas Tea, Bake Sale, and Penny Auction is back – Mark your calendar!!

**Wellness** – Now that winter is approaching, it's a good time to plan how we can continue to care for our physical and mental health even with the shorter hours of daylight. The 3-times-weekly exercise program at the Silver Tops Centre is for ALL seniors in the community, and you can participate at your own level of activity. There's bowling and shuffleboard if you prefer playing with others, and the fitness centre and online programs if you want to exercise on your own. Whatever you prefer, remember: it's your health – mental and physical – and you need to take care of it. Don't let the cold and snow steal your fitness!

Thank You....to our veterans. It's November. Take the opportunity to say a personal thank you to a veteran that you know and appreciate.

**Book Club** – Want to broaden your reading horizons? Don't get stuck in a rut reading only one genre. We'll be discussing *When the Crawdads Sing* this month. Next book: *13 Ways to Kill Your Community*

#### Tell Me a Story –

An extremely cold night, after a week or so of extremely cold weather. A doctor on rotation from Toronto currently visiting the nursing station on the reserve. A medical emergency requiring a doctor's presence in Pickle Lake. The makings of a good story:

At that time, in extremely cold weather, Ford products were noted for not starting, even when plugged in. The nursing station vehicle was a Ford, and it would not start. I owned a Chev. It was about 2 am when the call came requesting the use of my car, and I agreed to lend it, although not without some trepidation. After all, the doctor was from Toronto.

As I handed over the keys, I filled him in on the emergency equipment I kept on hand – sand and shovel in the trunk, chocolate bars in the glove compartment, blanket and cushions. He did not really take me seriously, made light of all my admonitions and advice, and was on his way.

Overnight, the weather broke somewhat, and it warmed up enough to snow. Shortly after lunch break, the school custodian, Zack, came to me and asked if I knew where my car was. I replied, "Sure. The doctor took it to Pickle Lake last night." Zack started to laugh, as he said, "It's in the ditch 5 miles up the road." Oh.

By this time, the nursing station Ford would start, so Albert (the nursing station custodian), Zack, and I headed up the road to retrieve my car. It was indeed in the ditch, at least a full car's length. Fortunately the snow was deep enough that any rocks were well buried, and the car was not damaged. The doctor had tried to shovel it out, had futilely put my cushions under the tires for traction, and had eaten all my chocolate bars!

Zack, Albert, and I spent some time putting the spare tire down flat on the snow for traction, placing the jack on the tire, jacking up the front end, and pushing the car back – again, and again, and again, ... until we finally got it on solid ground. We cleared the snow out from under the hood around all the important parts that make a car work, and being a good GM product, it started at the first turn of the key.

I never heard from the doctor, not even an offer to replace the chocolate bars. I think he was just too embarrassed. - Liz Russell

The Fiber To The Home project that was announced back in May in 2022 is on hold until the Spring of 2023. Tom Motyka, the President at Celerity Telecom offers an explanation about the project:

“Hello everyone, my name is Tom Motyka and I feel I should introduce myself and try to shed some light on this thread as it seems there is a lot of misinformation going around. I am the President at Celerity Telecom. We are a small, independent ISP that have been serving Northwestern Ontario since 2016 focusing on underserved regions when it comes to broadband. In 2020, we were approached by Northwestern Ontario Innovation Centre (NOIC) to see if we were interested in bringing Fiber-to-the-home FTTH service to Ignace as none of the larger telcos showed interest. Since our company is focused on providing better Internet services to towns just like Ignace, we jumped at this opportunity. At the time the Federal Government announced \$2.75 B in funding under the Universal Broadband Fund (<https://ised-isde.canada.ca/site/high-speed-internet-canada/en/universal-broadband-fund>) to bring better broadband to all Canadians, with the requirement of providing at least 50 Mbps/10Mbps speeds to areas approved for funding. NOIC, as the applicant, and Celerity as a funding partner and operator, submitted a proposal to bring FTTH to Ignace. In addition to the UBF applications, we also submitted an application for funding to ICON (<https://www.ontario.ca/page/ontario-connects-making-high-speed-internet-accessible-in-every-community>), which is an Ontario Government sponsored program to improve Broadband in communities throughout Ontario. We were delighted to receive notice in mid-2021 that our project was selected for funding by the Federal Government. We did not find out about the approval from ICON until later that same year. The funding broke downs as follows: 50 % of the project cost would be covered by Universal Broadband Fund (UBF), 24.64 % would be covered by ICON and the remaining 25.36 % would be privately funded by Celerity Telecom Inc. The estimated dollar amount for this project is around \$1.8M. In addition to the \$480 K investment Celerity is making to the infrastructure build, we will also be investing an addition \$300 K in other non-eligible expenses. During the winter months between 2021 and 2022 we worked hard to finalize all the details to get this project started as early as the weather would allow. An unusually long winter and slow snow melt meant we were not able to start any construction work until May, a full month later than what we had hoped. Unfortunately, due to what I can only assume were bureaucratic delays and red tape, an actual agreement with the Federal Government wasn't signed until late June and a funding agreement with the Ontario government wasn't signed until mid-September. This unfortunately, forced us to stop construction for winter and plan to start up again in the springtime.

Now, I would like to address some of the concerns in this thread. The conduit that you see sticking out of the ground will be buried or placed in a vault. There are **NO** live circuits anywhere in any of the conduit you see sticking out. The orange copper line that you see along with the conduit is called a tracer wire and is simply used for locating the conduit once it is buried and is what we use to locate the fiber when you request a locate from Ontario One Call. Our contractor tried to bury as much of the conduit as possible before they had to break for the season, but some of it is still obviously sticking out. This will be addressed this week as we have workers coming to place pylons and mark the exposed conduit. We realize that some damage to the conduit is likely by snow clearing or simply driving too close to the area. Any damage is repairable and will be addressed once we can get our crews back to the area in Spring; surface damage to the conduit will not jeopardize the project. We apologize for this inconvenience this will cause some residents and ask that the community work with us on this issue.

The project is **NOT** being abandoned and will be completed next summer; you have my word. There is absolutely no danger in someone simply touching the empty conduit or the orange wire along side it. The conduit that you see is called a 7-way conduit. The centre conduit will carry the main “Trunk” fiber cable that will run throughout the entire town. The 6 conduits surrounding the centre conduit are designated as drop conduits, they will be used to install the drop cable from our vault to your home, one vault is normally placed between 12 homes. When a customer wants to get hooked up, we will expose the main conduit that will run in the right of way in front of your

home, cut into the outer sheath and extend the conduit that is designated to service your home. We will use a small vibratory plow to install the conduit through your yard about 6" deep to the side of your home into a small device box. Getting our service is voluntary, no one is forced to sign up or get a conduit installed in their yard if they do not wish to.

To be absolutely clear, no one is getting a "kick back or fee for every hook up." In addition, the township was not asked to provide ANY funding towards this project. While it's true that you as a taxpayer to the Ontario and Canadian governments are partially funding this project, isn't it good to know that the investment is being made in your hometown rather than some far off community in another part of Canada which you would still fund regardless? In addition to the government funding, there is \$780K of private investment coming into the town, which would not have been the case if the project was not approved. Once the project is complete, Celerity will be offering speeds of 1 Gbps, which is likely much faster than you are currently getting from your existing provider. What's more, is that these speeds are symmetrical, meaning that your upload speeds and download speeds are the same. Sending a large email or simply backing up your smart device to the cloud will take seconds rather than hours. With the added benefit of having fiber service in your town, it increases the possibility of new families moving in if they know that a fast and reliable fiber optic connection is available and are now able to work remotely from home. With regards to monthly pricing, we base our pricing at levels similar to what larger carriers are offering in major cities, however please understand that a major cost of delivering the service to Ignace is the monthly cost we will be paying to our upstream provider to get a fiber connection from Ignace to the outside world. If you are concerned about the installation fee, please keep an eye out when we launch service next year as we will be having a limited time offer where we waive the installation fee while our crews are working in the area. Once our crews leave the area however, the installation charge will likely be re-instated to try to recover some of the cost to bring someone back.

Another valid concern that I see brought up is that why were the residents not informed of this project. This is absolutely a valid point and one that needs addressing. When this project was conditionally approved but no agreements were in place, we were asked not make any public announcements. A formal announcement was planned once all the agreements were signed and we expected this to happen mid-summer. However, with the extremely long delay for both levels of government to sign the agreements, meant that we would be making an announcement for a project that would likely not be finished until the following summer. Therefore, instead of raising everyone's expectations and then not being able to deliver services until months later, we decided to wait until we were closed to connecting our first customer.

I want to end this very long post by saying that if you have any questions regarding this project or have any specific concerns not yet addressed, please feel free to reach out to us directly by emailing [support@celeritytelecom.net](mailto:support@celeritytelecom.net). You can also message us through our Facebook page. We look forward to serving you in 2023!

### Boost Your Protection Against COVID-19

Give yourself the best protection this respiratory illness season and as you spend more time indoors. Vaccination is the most effective way you can protect yourself and your loved ones from the most serious effects of COVID-19.

#### Why get a COVID-19 booster dose?

Ontarians aged five and over are recommended to get a COVID-19 booster dose, regardless of the number of booster doses previously received to:

- Restore protection that may have decreased since your last dose
- Keep you protected from severe illness from COVID-19

All eligible Ontarians aged 12 and over will receive a bivalent vaccine for their booster dose. Bivalent vaccines provide better protection against the most recently circulating COVID-19 variants in Ontario.

For more information, visit [Ontario.ca/covidvaccines](https://Ontario.ca/covidvaccines)
