TOWNSHIP OF IGNACE

BUILDING PERMIT PACKAGE/ ADVICE TO APPLICANTS & BUILDERS

Building Permits - What are they?

A building permit is your formal permission to begin construction or demolition. It means that the municipality has approved plans for any new structure, addition or renovation. Approved plans must comply with the Ontario Building Code, local zoning by-laws, and other applicable laws and regulations.

Building permits regulate types of construction allowed in the community and ensure that building standards are met. The building permit process protects each homeowner's interests, as well as those of the community at large, and provides for the erection of safe structures.

Permits help ensure that any structural change is safe, legal and sound. It is unlawful to start construction or demolition before you get a permit. In many cases, your contractor will get permits on your behalf. However, remember it is the building owner who is ultimately responsible for complying with all building requirements.

You need a building permit if you plan to:

- Construct a new building
- Renovate, repair or add to a building
- Demolish or remove all or a portion of a building
- Change a building's use
- Install, change or remove partitions and load-bearing walls
- Make new openings for, or increase the size of, doors and windows
- Build a garage, carport, balcony or deck
- Excavate a basement or construct a foundation
- Install or modify heating, plumbing, air conditioning systems or fireplaces
- Reconstruct a chimney

You do not need a building permit to:

- Replace existing, same-size doors and windows, subject to distance from property lines
- Build a roofless deck under two feet (0.61m) high that is not attached to a building
- Build a utility shed under 107 ft² (10m²) subject to distance from property lines
- Erect a small portable car shelter (tarp style, no foundation)
- Install eaves troughs, provided that drainage is contained on your property
- Install kitchen or bathroom cupboards without plumbing
- Paint or decorate

For all electrical permits and required inspections contact the Electrical Safety Authority at: 1-877-372-7233.

All septic field and leaching bed installations need to be permitted and inspected by the Northwestern Health Unit. Contact them at 1-800-830-5978 or email Dough Vergunst (Chief Building Official) at dvergunst@nwhu.on.ca for application information.

What happens if you do not get a permit?

If you start construction but do not have the necessary permits, you may be ordered to stop work, be prosecuted, and even ordered to remove work already done. Contact the building department if you are not sure whether you need a permit for your project.

Building inspections when and why?

Building inspectors review projects during key stages of construction to ensure work complies with the building code and the approved plans. Inspectors may visit several times, depending on the project; they must be able to see the part of the work under inspection. Inspectors require a minimum of 48 hours notice to book an inspection.

THE CORPORATION OF THE
TOWNSHIP OF IGNACE

BUILDING PERMIT PACKAGE / ADVICE TO APPLICANTS & BUILDERS

How do I apply for a building permit?

The applicant must file an application in writing on prescribed forms. Every application must be signed by the applicant. The applicant must be the owner of a building or property or a person authorized in writing by the owner to apply for a permit on the owner's behalf. Every application must be accompanied by prescribed plans and specifications and the applicable permit fee payable to the Township of Ignace.

Where to apply for a permit?

You can make an application for any type of permit during regular office hours, Monday through Friday 9 am to 4:30 pm at the Township of Ignace, 34 Highway 17 West, Ignace, ON P0T 1T0, Ph: (807) 934-2202 Fax:(807) 934-2864 Email: info@ignace.ca

How long does it take to obtain a building permit?

The time required for the processing of a building permit application varies in accordance with:

- The quality and completeness of submitted drawing plans and site plan
- The degree of compliance of the project with applicable regulations and zoning
- The size of the project and current workload of staff

What types of permit plans are required?

Permit plans must contain sufficient information to determine whether the proposed work conforms to all applicable regulations. The site plan outlines the dimensions of the property, driveways, septic, wells, and all existing and proposed buildings. Major projects may require a current plan of survey certified by a registered Ontario Land Surveyor. If you feel you have good working knowledge of current construction practices and the Ontario Building Code (OBC) regulations, an owner may design the plans (where the OBC outlines: these plans are required to be prepared by a qualified designer and/or Ontario architect and/or Ontario engineer). Applications may not be accepted/permits cannot be issued, when the plans are inadequate or incomplete. All plans must be in conformance to the minimum requirements of the OBC. A good set of plans is the best way to see your project completed on time and meeting the allotted (and possibly under) budget.

Who will review permit plans?

Permit plans will be reviewed by building inspection staff for compliance with the Zoning By-Law, Ontario Building Code and other related standards and by-laws.

Who will obtain the approvals from other agencies?

It is the responsibility of the applicant to secure required approvals and permits from other agencies (where applicable), **prior to the issuance of a building permit**. Septic and Driveway permits are two of the most important. Building inspection staff will advise the applicant of the required approvals from other government agencies upon permit application, e.g. Health Unit approval and permission to install septic systems, MTO permission to install a driveway entrance, Lakehead Region Conservation Authority for permission to build on or near Use Limitation zones (shorelines, etc.).

What are the fees required when applying for a building permit?

The fee for the building permit will depend on the project. The permit fees are calculated by the Chief Building Official in accordance with the Permit Fees By-Law and are based upon the floor area of construction.

For further building information, please contact:

Gord Cuthbertson, Chief Building Official (CBO)

34 Highway 17 West Ignace, ON P0T 1T0

cbo@ignace.ca Cell: (807) 708-7548 Office: (807) 934-2202 Fax: (807)934-2864

THE CORPORATION OF THE
TOWNSHIP OF IGNACE
BUILDING PERMIT PACKAGE / ADVICE TO APPLICANTS & BUILDERS

NO BUILDING SHALL COMMENCE WITHOUT A BUILDING PERMIT. All building shall have the mandatory inspections completed or a "STOP WORK» order will be issued and will stay in effect until such time as the inspections have been completed. Inspections are carried out on Mondays or at the arrangement of the Chief Building Official (CBO). Inspections can be arranged by contacting the Municipal Office or calling the CBO direct. The CBO has the authority to ask that all non-visually accessible components and materials be opened or exposed if the mandatory inspections have not taken place.

The Chief Building Official will issue the permit once all required information has been received and reviewed. The CBO will deal only with the land owner (permit applicant) for site inspections and not with general contractors once the permit has been issued. Communications with the CBO to co-ordinate inspections with the progress of the construction project is the responsibility of the permit applicant. Please review the standard stages of inspections included with this package.

PLEASE NOTE: It may take the Municipal Property Assessment Corporation (MPAC) **up to three years to assess** your new construction for taxation purposes. Ensure that you keep this in mind as you could receive a supplementary tax billing for three (3) years' worth of back taxes for any construction done. Arrangements can be made with the Municipal Treasurer to prepay taxes to ensure that a credit balance is in place. The assessment used will only be an estimate and the actual amount may be higher or lower according to MPAC's ruling.

All construction must follow the Ontario Building Code and must meet or exceed their criteria for construction and/or demolition. It is the responsibility of the permit holder to meet these requirements and those listed below. Failure to do so will delay the review and evaluation of plans.

1. Working drawings

A set of working drawings in print and electronic format shall accompany this application and must provide the following:

a. Site plan

- Dimensions of lot (frontage & depth)
- Location of all existing structures
- Proposed location of new structures or additions (distance from lot lines and other structures)
- Location of well(s) and/or septic system
- Location of entrance
- lot description (north to be indicated)
- All relevant information pertaining to the construction

b. Floor plans

- Basement
- First floor
- Second floor
- To include electrical, heating, ventilation and plumbing

c. Joist and truss layout

d. Wall section and building section

e. Building elevations

f. Details

2. Filing of Plans

Plans must be filed and approved before a building permit will be granted. Plans may be drawn by the owner, BCIN Designer, or and Ontario architect only.

THE CORPORATION OF THE
TOWNSHIP OF IGNACE
BUILDING PERMIT PACKAGE / ADVICE TO APPLICANTS & BUILDERS

3. Ownership

Proof of ownership of the subject property is required.

4. Entrance permit

No building permit will be issued until the Municipal Road Foreman has approved an entrance permit to the subject property. Complete an Entrance Application (included with this package) if required.

5. Site Inspections

Builders are responsible for notifying the municipal office at least one week in advance to arrange for inspections.

6. Building on Provincial Highways

The Ministry of Transportation of Ontario (MTO) has jurisdiction over all entrances leading onto provincial highways as well as having building set back requirements. MTO approval in writing is a **prerequisite for the issuance of a building permit.** For more information on driveway entrances on provincial highways visit their website:

<http://www.mto.gov.on.ca/english/engineering/management/corridor/entrance.shtml>

7. Septic systems

Prior to the issuance of a building permit, you must contact the Northwestern Health Unit and apply for a permit to install a septic system. Visit their website for further information.

<https://www.nwhu.on.ca/ourservices/EnvironmentalHealth/Pages/Sewage%20Permits.aspx>

Once you receive your permit, include the pink permit copy with your building permit application. Once the system is installed and inspected, you will receive a *Completion Certificate* from the Health Unit. You must submit a copy to the Chief Building Official. This Completion Certificate is required prior to the issuance of an occupancy permit.

8. Telephone service

Where telephone service is to be installed or altered, Bell Canada should be advised in advance.

9. Potable water

You must submit a certificate of potable water from the Ministry of Health prior to the issuance of an occupancy permit.

10. Electrical Inspections

Electrical inspection permits must be issued by Electrical Safety Authority before electrical installations or alterations are undertaken. Contact the ESA at **1-877-372-7233** to discuss electrical projects.

11. Abandonment/cancellation of an application

A permit may be deemed to have been abandoned and cancelled six (6) months after the date of filing if work has not commenced or if the construction of the building is suspended or discontinued for a period of more than one year.

A review of this project application information did not include a review of minimum separation clearances from overhead electrical distribution wires (conductors) and transformers or other matters for which specific information was not provided. The owner/applicant is required to seek and obtain such other approvals as may be necessary. In all cases, the most restrictive condition applies. Where other restrictions cause any change to the location or construction of this project, such changes must be reviewed and approved by the Chief Building Official prior to construction.

THE CORPORATION OF THE
TOWNSHIP OF IGNACE
 BUILDING PERMIT PACKAGE/ ADVICE TO APPLICANTS & BUILDERS

The Ontario Building Code (OBC) requires that inspections be carried out at various stages of your building project. Failure to comply could result in "stop work orders" being placed on your property, orders to remove material, demolition of the structure (at your expense), or ultimately, fines could be levied. You are responsible for contacting the Chief Building Official **at least 2 business days** prior to requiring the requisite inspection. Please note that the following inspection(s) must be carried out by the Chief Building Official prior to proceeding to the next stage of construction.

Contact the CBO at the Office: (807) 934-2202, on his Cell: (807) 708-7548, or through Email: cbo@ignace.ca

**SPECIAL NOTE: ADDITIONAL INSPECTIONS OR CALL BACKS Will BE CHARGED ACCORDINGLY

Final inspection	- 100% completion of building, site and services	()

NOTES:

Your co-operation in this matter is important as lawyers and banking facilities request building inspection certifications stating that the various stages of work have been completed to the satisfaction of the building inspector and Ontario Building Code. This is not only when applying for a mortgage or insurance but when sale transactions take place as well. **This permit will be deemed "void" if no inspections have been completed within six (6) months from the date of issue.**
